Empress Member Gets \$15,000 For Relief in Tully Area

W. C. Smith Has Been Busy Man For Past Few Weeks

For the past few weeks W. C. Smith, M. L. A. for Empress has been a very busy man. Last week he was in Edmonton making arrangements for relief work throughout his riding, of which the rural district contiguous to Redcliff is a part. On his return he was accompanied by Hon. G. F. Griesdale, Minister of Agriculture, both of whom addressed meetings at Atlas, Blindfold, Buffalo and Empress, at which they outlined the arrangements under which road work and reservoirs would be undertaken as relief measures. They also discussed new legislations effecting present conditions.

While in Edmonton Mr. Smith was successful in securing a grant of \$15,000.00 to be expended for relief in the Tully East Area. This is part of the grant contributed by the federal and provincial governments for relief purposes. This amount is to be divided equally per head throughout the whole Tully East Area district.

Mr. Smith also made arrangements for the distribution of seedlings which are being donated by the more fortunate farmers in the northern part of the province. Bowell will be the headquarters for the distribution of the seedlings and it will be under the supervision of the U. F. A. at that point.

Redcliff Reminiscences

Taken From the Review File of Oct. 16 - 1915

Alderson and Suffield will establish granaries the contents of which will be sold and the proceeds given to the patriotic fund.

The first train continent train over the Canadian Northern left Montreal on Tuesday bound for Vancouver.

Dubeau - In Medicine Hat hospital on Tuesday, Oct. 5th 1915, to Mr. and Mrs. Adam Dubeau a son.

Twenty canes of wheat have been shipped from Redcliff for this year. It is estimated that the Redcliff district will market here 300,000 bushels of wheat. The average to date is 6 bushels to the acre.

Mr. and Mrs. J. R. Iler were badly burned at their home yesterday. While cleaning clothes with gasoline in a room where there was a small fire, the clothes caught and set one of the garments on fire. There was a great explosion, but the fire was extinguished before a tragedy arrived.

St. Louis Cardinals won their first game in the world's series yesterday, winning from Detroit Tigers by 3 runs to 2. Eddie Dean pitched for the Cardinals and the Tigers tried out three pitchers.

Rotary Carnival Car Comes To Redcliff

Karen Petersen Held the Lucky Number, 8236

There was great excitement among Redcliff people at the Arena in Medicine Hat last Saturday night when it was announced that the Rotary Carnival car was coming to Redcliff. "Who won it?" every body was asking, and when it was finally known that Karen Petersen, daughter of R. Petersen, the dayman, held the lucky number there was great rejoicing. The number was 8236 and Karen paid 34c for it which she bought from W. Armstrong of Medicine Hat. As 35c was the highest price that could be paid Karen thought it was a good thing she had bought it. The same time there were drawn smaller priced tickets.

For her 34c ticket Karen Petersen now has a fine V8 Ford car equipped with a radio and all modern conveniences. The car was delivered to her on Monday. It is being much admired by all. This is the second time Rotary Carnival car has landed in Redcliff. Roy Smith drew the lucky number in 1926.

Redcliff Contributes To The Navy League

Organized, F. Cooke, Convened The Town Last Week

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of men of the Merchant Marine service. Redcliff citizens subscribed \$10.75 to this cause in a recent campaign here conducted by Fred Cooke, organizer of the Alberta division.

Further contributions may be sent to Fred Cooke, 1107 15th Ave. West, Calgary, Alberta.

Churches

JORDON MEMORIAL UNITED CHURCH

Pastor: Rev. R. Erskine Pow 10 a. m. Church School. 11:15 Morning Service. Subject: "Seed to the Sower." 3 p. m. Service at Bowell. 7:30 p. m. Evening worship. Harvest Home Service. Subject: "Bread to the Eater."

If we sow the seed, and till the soil, nature reward us with impartial generosity.

ST. MARY'S CHURCH

Celebration of Mass every Sunday of each month except first Sunday, at 8:30 a. m.

ST. AMBROSE CHURCH

Rev. H. S. Hammett, Vicar. 8:00 a. m. Holy Communion 7:30 p. m. Evensong.

As the vicar will be at Holy Trinity, Medicine Hat, at 11 a. m., there will be no 11 a. m. service at St. Ambrose.

"While we have time, let us now do good to all men." Gal. 6

Don't Forget the Illustrated Lecture In Cliff Hall Tonight

P. Heyburn To Be Located in Medicine Hat

Will Have His Office in The Court House There

In future Mr. P. Heyburn, who has been supervisor in connection with government work in the Tully East Area, has been permanently located in an office in the Court House at Medicine Hat. He will co-operate with Mr. Gardiner, superintendent of road work, regarding the construction of reservoirs and roads to be done in the Tully East Area. Locals and road foremen throughout the district may now more conveniently get in touch with Mr. Heyburn for information they may require along these lines.

It is hoped to get this work under way as soon as possible so that advantage may be taken of the favorable weather.

Next Monday will be observed throughout Canada as Thanksgiving day.

The weather has again settled down to the regular fall and usually handed out at Sunny Southern Alberta.

On Thursday evening last a thanksgiving service was held at St. Ambrose Church. It was conducted by Rev. H. C. Gibson of Vernon, one time vicar of St. Ambrose. The service was largely attended.

After the service a reception was held in the Parish hall where Mr. Gibson was welcomed by his old friends of the parish and town. During the evening Mr. Gibson gave an address which was greatly appreciated and a social hour was spent renewing old acquaintances.

JUST FOR FUN

"Margot Asquith's unfortunate picture of a portentous lady of the British aristocracy. Rectitude, platitude, highbrowitude."

We've had so many misses in our family that we have a note on our coat of arms—Lorraine Stevens in McCall's.

Even the Sears Roebuck catalogue turns literary: The new portable typewriter is so quiet that when it writes it whispers.

Don't believe these just because they are proverbial.

Look before you leap, Yas. But—He who hesitates is lost.

A man gets no more than he says for.

But the best things in life are free.

Leave well enough alone.

But—Progress never stands still.

To Try Out Health Insurance in Alberta

Will Experiment in Two Small Units First

The public of Alberta is evidently quite prepared for a complete try-out on a small scale of the health insurance proposals recommended in the report of the commission on state medicine presented to the Alberta Legislature at last session, and it is not classes concerned or ready to give full co-operation in such experiment, to judge by the feeling evident at the general conference on the subject held last week at the University of Alberta. Indication of this attitude was given by representatives of various organizations most vitally concerned in the proposals. It was made abundantly clear during the conference both by Hon. Geo. Hawley, Minister of Health, and Dr. A. C. McGowan, who was secretary to the commission, that it was not the intention of the Alberta Government to carry out the proposals of the commission for certain health insurance plan on any wide scale until such time as experimentation on a small scale had established the soundness of the proposal. The plan is that while legislation will probably be introduced at the coming session to give the proposal legal status, yet it is the intention to carry out an experimentation first in only two small health units, one being in the city and the other a rural unit.

Start Buying Cattle In Drouth Areas

Instructions Given to Start Operations At Once

Purchases and shipments of surplus cattle under the new plan recently announced by the provincial government are to begin at once it is stated by Hon. P. S. Griesdale, minister of agriculture, arrangements having been completed with the federal government and railway companies. Between 7,000 and 8,000 head of cattle will be bought from farmers in the dry areas and taken to the Edmonton and Calgary stockyards, and it is expected that the first shipment will arrive early this week. Instructions have gone out to field men representing the department to commence operations at once.

RADIO PROGRAM BY EXTENSION DEPT.

Once more the University Extension Department offers to the people of Alberta a broad cast program of lectures, music and drama for the fall and winter months. It will be seen from the schedule that the arrangement this year enables listeners to choose the subject that they are interested in and know that they will be on at the same hour every week. A wide variety of subjects will be dealt with which will be of interest to both urban and rural listeners.

School Field Day Was Great Success

Susan Skidmore Wins The Local School Championship

A very successful field day was held on the local Stampede grounds yesterday afternoon under the direction of the school. There was a fairly good attendance of spectators and the pupils were there in full force. Having met at the school to march in body to the grounds. The several events were contested, making a most interesting and exciting afternoon for all present.

There was a great victory at the close of the program when it was announced that Susan Skidmore had won the local school championship. This was the most point in the different events on the program. The medal was donated by Mrs. Skidmore.

As announced, donated by the common Glass Co., for the common with the outstanding money went to grade above other outstanding winners in this grade, besides Susan Skidmore with 12 points were the other girls with 11 points and John Hope with 10 points.

In arranging the program the school was divided into five different divisions according to age. There were four events in each division for both boys and girls and points were given to the winners of each division. At the conclusion these points were tallied up to determine the championship and the grade winners.

Diploma Winners

Age 6 to 7—Girls: Marjorie Lane and Ruth Jorgensen, 8 points. Boys: Andrew Madson, 6 points.

8 and 9 years—Girls: Muriel Hitchen, 7 points. Boys: Joe Myers, 8 points.

10 and 11—Girls: Eugene Rose, 8 points. Boys: Edward Martin, 9 points.

12, 13 and 14—Girls: Ellen Hope, 10 points. Boys: Ralph Hargrave, 11 points.

15 and Over—Girls: Susan Skidmore, 12 points. Boys: Reggie Rose, 8 points.

Those responsible for winning the prize for the grade making the best showing were: Susan Skidmore, with 12 points, Ralph Hargrave 11 points and Ellen Hope with 10 points.

On the whole the event was a great success and the teachers are to be congratulated on the splendid manner in which it was conducted.

Thanksgiving Services At St. Ambrose

Church Taxed To Capacity To Seat Congregations

"The Harvest Thanksgiving services held at St. Ambrose Church last Sunday were largely attended. The church was taxed to capacity to accommodate the crowd at both services. Fruits and Vegetables in procession decorated the already beautiful little place of worship. Rev. Mr. Hammett conducted both services when most appropriate sermons were preached and suitable music rendered by the choir.

Victory Bond Conversion Helps Business Recovery

Prime Minister's Statement Receives Nation's Approval

Ottawa, October 3rd The Prime Minister's frank expression of opinion regarding the 1934 Refunding Loan has met with warm and encouraging response from bankers, insurance and trust company executives, business men, professional men, agriculturists and labor leaders throughout the country. The concrete evidence of business recovery from the low point of last year which Mr. Bennett stressed in his opening announcement such as a 56% increase in industrial production, 17% increase in employment, 33% increase in farm products prices as well as substantial improvement in carloadings, electric power production and wholesale prices, emphasizes the strengthening of the national confidence, the achievement of national economy and the steady general upward trend in business.

Completion of this year's refunding program will bring the total war loan refinancing (inaugurated in 1931) to over \$1,000,000,000.

\$9,000,000 per annum has already been saved in interest charges and when this year's operations are concluded, the annual saving in interest will be about \$14,000,000. This saving more than offsets interest charges on debt incurred to meet the extraordinary burdens incident to unemployment relief and eventually should relieve the government to reduce taxes.

The tenor of the comments from bankers, insurance and trust company executives, industrialists, agriculturists and labor leaders is fully summed up by the unanimity of their opinion which is that Canada has emerged from the depression with probably less strain than that experienced in many other countries; and that while our progress is gradual, it is well founded. There have been no disruptive recessions consequent upon rapid a rise.

The consensus of opinion is that by reason of the favorable basis of conversion and the active active offer (particularly in the long term bonds) the majority of 1919 Victory Bond holders will convert and in new investors handed to see an allotment of the new bonds.

On Monday evening a whist drive and social evening was held in the parish hall at which there was a splendid turn out of both young and old.

The prize winners were: Mr. and Mrs. H. Bardell; Mrs. J. H. Podest's Sr.; and Mrs. McDermott.

After the whist drive, refreshments were served following which a large quantity of vegetables and fruits were sold to the highest bidders. Good prices were realized and the stock was sold.

LONDON'S NEW SKY POLICE

Floating Factory Designed To Produce Electric Power By Use Of Warm And Cold Sea Water

A unique floating factory designed to make tropical sea water produce cheap ice where it is most needed steamed out of Dunkirk harbor recently for its first test.

The experiment is to be conducted at Rio de Janeiro and it is there the Rio's inventor, George Claude, 61-year-old Frenchman, awaits her. A few hours behind the ice ship sailed the 88. Myron, carrying a tube which, when fitted together, is one-half mile long, part of the ice-making equipment.

The ice ship is the 10,000-ton steamship, "Tunisie," equipped with a fantastic plant for producing electric power by the action of warm and cold water drawn from different levels of the sea.

This free power inventor intends to produce 1,000 tons of ice daily to cool the drinks and preserve the food of sweltering South American cities.

On the deck of the floating ice factory are immense reservoirs and a complex system of pipes, turbines and refrigerating units and to supply three with the requisite sea water of differing temperatures. The water from tube A half-mile (700 metres or 2,300 feet) long and 2.5 metres (eight feet) in diameter.

M. Claude's new venture, with which he thinks Jules Verne would have been delighted, is the fruit of experiments at Capbreton, France, in 1928 and off the coast of Cuba in 1931 in which he used a similar tube to test his theory. The tube is a harness forces in warm and cold currents of the same sea.

The process, briefly, consists of making warm water from the surface of tropical sea boil by introducing it into a vacuum, utilizing the vapor to run turbines, and then condensing it with cold water drawn from the depths.

When the "Tunisie" reaches Rio de Janeiro, or some other point near the Brazilian coast, it will drop its long tube overboard, with an anchor to hold one end near sea bottom, and huge special float, nine metres (30 feet) in diameter, to keep the other end above sea level. The tube will then rise up to the buoy, connect its shipboard apparatus to the submerged pipe and commence, Claude hopes, ice production.

Cannot Remove Noise

Engineers Will Have To Put Up With Locomotive Whistle

In a 2,000 word judgment, the board of railway commissioners for Canada decided that railway engines will just have to sit there and take it. If the locomotive whistle strikes in their ears, it's their business. The board can do nothing about it.

It all started when the Brotherhood of Locomotive Engineers and Firemen asked the board to order railways to place whistles "where the sounds therefrom will not be injurious to the ears of the engineers." The board, heard many witnesses, instructed its men to ride in locomotives to test whistles with their own ears. Investigated types of whistles and measured different engines.

The Solomon-like judgment was then rendered. It ended with these words: "It does not appear that anything can be done, unless the railways find ways and they can move this whistle forward and increase the distance between it and the cab windows."

How It Originated

Two Explanations As To Source Of Term "Grass Widow"

The term "grass widow" is said to have originated among the Anglo-Indians about the middle of the Nineteenth Century from the practice of European husbands residing in India sending their wives and children to the hills during the hot season. In this section the grass is plentiful.

A more plausible suggestion is that it arose in America during the gold rush in California; a man not infrequently put his wife and children and to board, while he went to the diggings. This he called "putting his wife to grass."

A Flourishing Industry

Bones Go Through Many Stages To Produce By-Products

The millions of bones that are thrown away every year help to make a flourishing industry. Their by-products and uses are practically endless, and there is no waste. Bones go through many stages. First they are boiled until all the fat is extracted; this is made into glycerine and certain types of lubricants. Shins and marrow bones are used for making handles. The rest are ground into fine powder in vast mills and have an infinite number of uses. A certain amount of this powder is used to make bone-manure and bone-meal for farmers. It is extremely valuable, sugar, salt, and other refineries utilize bones in some of their refining processes. Bones are also used for case-hardening cast steel. The "wound cure" of old bones is a most powerful and penetrating odour, which, strange to say, is not in the least harmful. Aesthetic bone is used for making handles. Bones are also used for making handles. Bones are also used for making handles.

Here we see Scotland Yard's subways—a plane with a horizontal revolving propeller, which enables it to hover in the air—leaving Hanworth Aerodrome for a flight over London. This plane is to be used not only in conjunction with traffic control in London, but also for assisting the criminal investigation department in their pursuit of criminals.

A Worth-While Discovery

Science Has Produced Method For Detecting Watered Milk

Inventions lying dormant in the patent offices of the world hold the secret for quick industrial and economic recovery. Sir James B. Henderson took the British Association for the Advancement of Science at Aberdeen, Scotland.

Industrial research has been greatly stimulated by the depression, said Sir James, professor and inventor, while since the war development of inventions has lagged.

Since the war, he said, "the only type of invention which has been in demand has been one which will further reduce employment by saving costs of production."

Another section learned science has produced a method for detecting the watering of milk.

Dr. J. F. Tocher, professor at the University of Aberdeen and bacteriologist, said a fool-proof method of detection has hitherto been one of the main difficulties of those charged with seeing whether milk measures up to statutory regulations.

Ekimno Made Mistake

Thought Dress Model In Advertisement Was Real Woman

The story of an Ekimno who had the wrong idea when he read an advertisement was told at Montreal by Ashley Cooper, first governor of the Hudson's Bay Company to travel to the Arctic by the sea-harsh route.

The Ekimno saw the advertisement of a dress with the statement it could be obtained for \$25. He went to the trading post, presented a fox skin worth \$25 and said: "Would you please send this put to the Hudson's Bay store and ask them to send this woman because I want to make her my wife."

A Lively Sista

"Jane," cried the mistress, reproachfully, "you informed me a while ago that you were going to have a little sleep."

"Yes, Madam," replied the maid. "Then," pursued her mistress, "what were you doing at the garden gate when the soldiers passed by?"

"Having dirty winks," answered the maid, unabashed.

The cost of the World War in Britain is estimated at approximately \$180,000,000,000.

Children had to rush for shelter when hordes of dragons descended on the seaside town of Bonhill, Ontario.

Millions of the insects swarmed the sky for several hours. They flew in people's faces and made walking impossible.

British Professor Shows That Tree Cultivation Is Best Means Of Conserving Moisture Supply

Houses Of The Future

Will Be Vastly Different From The Kind We Know

What will the homes of the future be like? A writer in the Birmingham Weekly Post. Already in place of brick and stone walls it is possible to have hollow walls of metal-oustaining composition, forming rooms like vacuum flasks that can be kept at a steady temperature night and day. They can also be lined with soundproof material, so that one can read or study in happy ignorance of what is going on in other parts of the house.

Whether this is an advantage, of course, is a matter of opinion. Another sort of house already in the realms of possibility is one of tinted or clear toughened glass. The great advantage of this is that its walls can be saturated with sunshine.

At the Building Research Station at Watford, England, a house is being constructed of glass, which will be impervious to all climatic conditions. One or two rooms are being formed inside a shell. Here all sorts of "weather" are reproduced, so that requirements for combating excessive damp, heat and cold can be thoroughly tested to the hark root.

It is not only in structure, however, that the houses of the future promise to come near to perfection. Life inside them should be a luxurious one, by any existing, after Professor A. M. Low, the inventor, has fitted his glass house with a marvellous array of labor-saving gadgets. Among them is a device for making the garage doors open at the sound of the professor's motor horn. A robot alarm clock five minutes before going off lights a spirit lamp for the morning and there is an arrangement by which fires anywhere in the house will light themselves at a fixed time.

Perhaps the most useful device of all is an indicator that shows when callers are coming up the garden path. Connected with it is another gadget for stopping the bell ringing if these callers are undesired.

No doubt at the present time a certain amount of risk attaches to the use of these devices. The professor was once testing a new gadget that was supposed to have enormous power. It suddenly exploded it itself instead of the window and the professor out of the door.

Directly received

Government reports tell of the increased output of vegetables in the past half century. Home gardens are given more attention and highly specialized vegetable farms have been developed near the centres of population. The most common kinds of vegetables from plain cabbage to the bright blue peppers. The housewife has become vegetable minded and it is no longer gardeners or gardeners who purchase freely and regularly the sorts that are in season.

At the meetings of vegetable growers in Toronto recently one of the speakers from Washington, D.C., made a comparison of the amount of an English banquet of thirty years ago and one prepared at a New York hotel a year ago for home economy. The earlier bill of fare started with thick soup and larded fish and four kinds of meat, followed by substantial puddings and ended with a luscious cheese. Whatever vegetables were used were in quantities too small to be worth mentioning. The modern banquet, planned with a view to economy and health had for decorative effect radishes, green onions and celery leaves. There was soup with a Russian name but entirely vegetable in its composition. The main course was roast beef with green peas and a pineapple salad. Strawberries and ice cream formed the final course of this substantial meal which was planned to give proper balance between meat and vegetables.

Just As Easy

"Mummy, do you say 'It is' or 'It isn't'?"

"Always remember the rhyme: 'It is' said the spider to the fly."

"But couldn't you say 'It is not'?" said the spider to the fly.

A piece of tartan worn by Prince Charlie at the Battle of Culloden was recently auctioned off in Scotland and brought only 30s.

No man is smart enough to tell his own son anything when he leaves college.

THEN AND NOW

1. fifteen years ago Canada was engaged in floating one of the most successful of its war loans. National enthusiasm was at its highest pitch. Business was booming and money was plentiful. Results exceeded the fondest hopes, nearly 800,000 citizens subscribing for the 1919 Victory Loan Bonds. True the income yield of 4½% was very attractive, but opinion then was that people subscribed more from their wholehearted desire to assist national reconstruction rather than because of the attractive rate of interest.

Holders of these 1919 Victory Bonds, which will mature November 1st, are now being asked to convert them into bonds of the 1934 Refunding Loan. That the majority of holders of 1919 Victory Bonds will avail themselves of this privilege there can be no doubt. They know what a safe and profitable investment they have had and will surely wish to continue it. The record of Dominion of Canada Bonds during the past few years when investors have suffered loss of capital and distress of mind, demonstrates conclusively that there is no safer investment than Dominion of Canada Bonds. Security of principal is paramount in any investment. Consequently, when the "one-sail" security of Dominion of Canada Bonds is coupled with the desirable "income yield" as offered by the new bonds to convert as well as applications from new investors should be both prompt and enthusiastic.

NOT SURPRISING

The number of farmers who have taken advantage of the offer to move out of the drought area of south-eastern Alberta is far below what government officials anticipated. So far only about 100 families have been moved.

This is not surprising in view of the fact that it has been announced the Dominion Government was taking over the administration of the drought areas with the view of making them self supporting by the introduction of new methods and by experimenting with new grains and grasses of drought resistance qualities. This being the case it is only natural that those who have lived in the drought area for a number of years will hesitate to leave now but would prefer waiting a little longer to see how the federal government's plans will work out. This looks like the sensible thing to do both from the standpoint of the farmer and the government, since farmers will be needed to try out the proposed schemes. And who would be better fitted for this purpose than the ones at present on the land.

Thanksgiving Day will be observed throughout Canada on Oct. 8th.

Issue price: 98.16 and accrued interest, yielding 2.90% to maturity.

Eight-year 3% Bonds, due 15th October, 1942
Issue price: 97.00 and accrued interest, yielding 3.45% to maturity.

Fifteen-year 3½% Bonds, due 15th October, 1949
Issue price: 96.50 and accrued interest, yielding 3.81% to maturity.

Principal payable without charge in lawful money of Canada at the Head Office of the Bank of Canada, Ottawa, or at any of its branches in Canada. Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any chartered bank.

Denominations

Two-year Bonds, \$1,000
Five-year Bonds, \$500 and \$1,000
Eight-year Bonds, \$500 and \$1,000
Fifteen-year Bonds, \$100, \$500 and \$1,000

Cash Subscriptions

All cash subscriptions will be subject to allotment. Following the announcement of the plan of allotment, payment in full for the bonds allotted must be made promptly against delivery of interim certificates, which will be effected on or about 15th October.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1934, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, tender their bonds in lieu of cash on subscriptions for a like par value of bonds in one or more maturities of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 2% Bonds and the Five-year 2½% Bonds.

100% of their par value on subscriptions for the Eight-year 3% Bonds if effected on or before 6th October, and 100% of their par value after that date.

100% of their par value on subscriptions for the Fifteen-year 3½% Bonds if effected on or before 6th October, and 100% of their par value after that date.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to \$250,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada. The proceeds of this Loan will retire \$222,216,850 Dominion of Canada 5½% Bonds maturing 1st November, 1934. The balance will be used for the general purposes of the Government, including the redemption of short-term Treasury Bills.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open 1st October, 1934, and will close on or before 15th October, 1934, with or without notice, at the discretion of the Minister of Finance.

Ships Of The World

One-Third Of Existing Shipping Is Owned By Great Britain

The old song about Britannia ruling the waves is not in high favor just now. Still, there can be no harm in pointing out that in a mercantile sense, the waves would long be Britannia's rule. Lloyd's Register of Shipping, published for the 101st time, points out that by far the busiest shipyards in the world are the British and that of all the existing shipping in the world, one-third is owned by Britain.

At Havre, the French Line is busy putting the finishing touches on the launched Normandie for her ownership of the seas next summer. But next month Queen Mary will travel north to the Clyde there to launch a 73,000-ton monster which in 1938 will take away the Normandie's crown of size. The new queen will be the Victoria.

Most of us remember when a 20,000-ton ship was an "ocean greyhound." They were called that at the turn of the century. Lloyd's Register of Shipping reports that ships of this size on the world's oceans now number about 70, of ships between 30 and 40 thousand tons there are more than two dozen. Since 1914 total world tonnage has jumped from 45,000,000 to 64,000,000, with one-third of this, as said, owned by the British Empire. The largest merchant marine belongs to the United States with 10,000,000 tons, exclusive of 2,600,000 tons of Great Lakes shipping. Japan and Norway follow with 4,000,000 tons, then Germany with 3,700,000, then France with 3,500,000, Italy with 2,900,000.

At the turn of the century one-third of the world's shipping was built in Britain. The old "tail ship" the barques, brigs and brigantines remained. To-day all but 1,000,000 tons are steam or motor. The old "tail ship" was nine-tenths of all self-propelled ships burned coal; to-day one-half is oil. On sea, as on land, the proportion has been revolutionized.—Ottawa Journal.

Have Difficult Task

Committee Of Twelve Members Seeking For Real "Spook"

The age-old endeavor to find a tangible, real, dyed-in-the-wool "spook" is to be undertaken by a committee of distinguished scientists, philosophers and psychologists of the University of London which has been formed to investigate psychical phenomena.

This new committee, consisting of 12 members, will take over the work of the National Laboratory of Psychical Research, but it will not, however, be officially connected with the university.

Among the various "phenomena" to be investigated, will be included telepathy, clairvoyance, automatic writing, psychometry (superior knowledge of the past history or associations of objects handled by a medium), poltergeists and other alleged mental and physical manifestations produced by so-called mediums.

Foreign correspondents for the committee, representing the United States, British dominions and several other European countries, are to be chosen to aid in the gathering of data for the study.

The committee hopes to receive the aid of the general public in obtaining data for the investigations, members explaining that only with such co-operation will it be possible to elucidate those mysteries of the senses which for nearly a century have been studied under the term "psychical research."

Humid Antic Tide

"Humid" Borden, of Wicahio, holds the proud title of Keeper of the Lookout of the Chicopee Falls, a post dating back to the thirteenth century. Mr. Borden's job is to watch the horizon every day for fleets of hostile ships. A diligent execution of this duty earns him a salary of \$1.26 a day.

New Plant For Alberta

Plans for the establishment of a wool scouring and manufacturing plant in Alberta appear to be nearing completion. Eastern interests are said to be behind the move and the plans call for a \$50,000, scouring plant to be erected at one of the large centres in the south of the province.

Some species of moths in the American tropics measure almost a foot in wing spread.

The world's driest spot is a desert of 200,000 square miles in Chinese Turkistan.

KILLIES GUARD ROYAL PALACES FOR FIRST TIME IN TWENTY-FIVE YEARS

When the Guards Brigade left London to take part in military manoeuvres, killies took over guard duties at Buckingham and St. James' Palaces for the first time for twenty-five years. Our main picture shows the 2nd Battalion Cameron Highlanders arriving at St. James' Palace where a huge crowd assembled to see the change over. Inset, a little reads guard orders during the change over at Buckingham Palace during the changing of the guard.

Taking Year's Vacation

Wife And Daughter Of Trading Company's Arctic Manager Head Long Trip

The chill winds and low temperatures of the Arctic won't mean a thing to this winter to Mrs. R. Paley and her two-year-old daughter, June, who arrived in Edmonton recently to start a year's vacation from their home at Cambridge Bay on the southeast end of Victoria Island off the Beaufort Sea.

It took them nearly two months to reach Edmonton from their northern home. They walked 10 miles along the rocky coast of Victoria Island with Eskimos carrying their luggage before they reached water sufficiently open to allow them to use an open boat, with a kicker engine. Then they travelled for two days to where the Niglit, trading ship of Capt. Paley, had been frozen in when caught in the ice last fall.

"A storm was blowing as they sighted the vessel and they had to lay-to until the wind abated," Mrs. Paley said. "We were out of food and had to sleep on the rock in the storm, said Mrs. Paley. "When we did board the ship we were lost to days in the ice pack before we could get away to Coppermine to take the plans to Edmonton. They left their home June 18, and arrived in Edmonton, Aug. 18.

Little June was born at Cambridge Bay in the Arctic circle on Feb. 23, 1932. Her father has charge of the Canakaka Trading Company's Arctic post there, and skippers the trading ship Niglit, meaning Wild Goose in Eskimo.

The nearest doctor and the nearest white woman to the Paleys' home are at Aklatik, 1,000 miles away. June plays with the Eskimo children and consequently speaks more of their language than she does English.

Mrs. Paley came from England to Canada when she was 16 years old. She met Capt. Paley, then a non-commissioned officer of the Royal Canadian Mounted Police in Edmonton and married him in 1930 at Vancouver. He accepted the post of Arctic manager for the trading company and with his bride sailed from San Francisco for their new home, a journey of four months.

"Coal is \$180 a ton at home," said Mrs. Paley. "and in winter we wear Eskimo clothes made of seal skin with the fur on the outside. Our Eskimo customers—Chinook Athabasca men—like timber, building supplies and fuel must be brought 1,000 miles to Cambridge Bay from Alaska. Mail arrives once a year by the R.C.M.P.

Substitute Not Good

Customer—"I want to buy three potted geraniums."

Florist—"We have no geraniums but I can give you chrysanthemums."

Customer—"Chrysanthemums won't do. These plants are to replace some geraniums I promised my wife to water while she was away."

The Greeks appear to have been the first to invent an alphabet in which the single sounds of their language, vowels as well as consonants, were expressed by a series of letters.

"How is it," asks a writer, "that widows always seem to marry again?"

It would be unkind to put forward the theory that it is because dead men tell no tales.

Horses Are Victims

Veterinary Congress Finds Bite Of Mosquito Causes Severe Itches

The mosquito has once more been identified as a leading "thief of the world's" as the Irish would say. She, for it is the female mosquito that bites and poisons, has a long record of misery to her discredit. Yellow fever is one of their terrible plagues the mosquito carries around, male of various kinds and several other diseases not all of which are fully determined. These are for human trouble.

Now comes the news that Mrs. Mosquito, not satisfied with afflicting the human species, has turned to the equine for her pleasure and given them sleeping sickness at the end of her sharp proboscis. The identification has been made at a meeting in New York of the twelfth international veterinary congress.

It will scarcely be credited that one small mosquito can give a horse encephalomyelitis, but one job of its astonishing surgical apparatus, consisting of "beak, saw, teeth, pumps and a marvelous assortment of ingenious weapons for getting under one's skin, enables it to plant the poison and the horse is no longer a sane, but a liability.

They call it sleeping sickness, and it attacks cattle as sheep as well as horses, for Mrs. Mosquito is no respecter of persons. No wonder her special title is "Beastkiller, the lord of flies." She places death in her punctures.—Hamilton Spectator.

Man's natural inclination, supported by definite scientific investigation, has established the fact that a mixed diet is most suitable to the requirements of the average human body under normal conditions. A properly balanced diet should therefore include a reasonable amount of both in addition to green leafy vegetables, cereals, milk, eggs and fruits.

The real problem for the consumer is simply one of wise and careful buying, towards which end Canadian government grades have been established.

Dry cure and brine or pickle cure are two general methods for curing meat.

FANCFUL FABLES

I SAY, MY GOOD FELLOW, WHAT WOULD YOU CHARGE TO GIVE ME BORING LESSONS!

The Secession Movement

West Australia Is Anxious To Withdraw From Commonwealth

The secession movement which crops up periodically in Canada, especially in Western Canada, has advanced a stage further in Australia than it has ever reached in this Dominion: the State of West Australia has actually reached the point of declining to petition the King for permission to withdraw from the Commonwealth. The constitutional aspect may interest Canada.

The Commonwealth was established by an Act to which no change may be made without the approval of both federal houses and by federal referendum. As in Canada, federal law is binding upon the States but State law cannot override those of the Commonwealth.

The people of West Australia argue that their State was not one of the original federating states for, in the words of the Constitution Act of 1900, "The people of New South Wales, Victoria, South Australia, Queensland and Tasmania humbly relying upon the blessing of Almighty God, have agreed to unite in one indissoluble 'Federal' Commonwealth under the Crown of the United Kingdom."

Against this argument it is pointed out that while the constitution was being discussed in the Parliament of the United Kingdom a referendum was held in West Australia, the result of which was overwhelmingly in favor of joining the Commonwealth and that the only reason West Australia was not included in the bill was that the bill had already been passed and was under royal assent at London. The West Australian electors, therefore, it is shown, knew what they were voting for especially as the bill was discussed simply and explained at meetings called in connection with the referendum.

But the petition of the people of West Australia now complains of an "intolerable grievance" suffered by expropriation, as to which the Parliament of the United Kingdom must decide.—Calgary Abertan.

What Depression Has Taught

Detroit Women Give List Of Much Needed Lessons

A New Yorker writes:

You should have an editorial about what we learned during the depression.

The family earnings and savings had to be pooled. We learned to cooperate.

No more could \$5 be carelessly dropped at bridge or spent for an unnecessary taxi. Wastes had to be stopped.

Your car or car must now serve family needs that are thought out, not being given nowhere about nothing else of the kind.

We live on the money we get, not on credit. Each dollar must be taken in the best way possible. That takes forethought.

The restrictions were terrible hardships at first but are not terrible as they look back. Perhaps with a two or two in, one's simple dinner at home proves as enjoyable as a party at a restaurant place where the money flows like the wine.

We have learned to enjoy the simple things. They are best. We cannot do so before. We are learning to value truth and sincerity.

I look around me and see all the fruits of life drawn closer together. "Keeping up with the Joneses" is over.

The Great Game of Pretense was exposed, showing us up to all eyes for just what we are. There are fewer snobs and more real people.

The depression taught us to realize that we needed to learn and that we and our children must never forget. The housewife and mother who thus write us is correct. We should indeed have the editorial. This is it. She wrote it. Let cases vary as they do, the applications are universal. Individuals, families, cities, countries, states and the United States, we hope and believe have been taught much they will endeavor to learn. All must remember.—Detroit News.

League Powerful Factor

The League of Nations economic committee, made up of well-known economists, suggested to the league council the organization of economic groups in international relations was "destined to form a powerful factor in the restoration and recovery of world economy."

A Real Feast

Hungarian wedding feasts are real events. At a recent three-day feast at Magyoc, in the southern part of Hungary, two men, eight pigs, one calf, 500 hens, ducks and geese and 1,400 liters of wine were consumed.

Wanted: One Capital Of Russia

The ruins of the ancient city of Tashkent, whence merchant caravans once travelled to trade with Persia, India, China and the Byzantine empire, have been found by Soviet archaeologists ninety miles from Tashkent.

Preliminary surveys have disclosed the whereabouts of the old palaces and market places of the vanished city, once, say the explorers, a place of wide, straight streets, broad squares and many reservoirs.

In the nearby mountains there have been discovered slag heaps and mine shafts unworked since the ninth or tenth centuries, demonstrating that the great principal wealth of Tashkent was in its lead ore.

According to Arab historians, Tashkent was once the capital of the Kingdom of Ili, a populous town surrounded by a thirty-foot wall. Remnants of this fortification have been discovered and more excavations are expected to begin shortly.

The warm summer months are opportune for Russian archaeologists and Tashkent is not the only recent discovery.

MAKES FALSE TEETH
FEEL LIKE NATURAL

There must be a reason Dr. Werner's Powder is the world's largest seller and prescribed by leading dentists. It makes false teeth so firm—they fit so comfortably—that all day long people wear them with false plates. Leaves no colored,ummy paste—keeps mouth clean and breath pleasant—the best powder you can buy yet cost a small—any drugstore.

WORLD HAPPENINGS
BRIEFLY TOLD

Bound for England after six years as British high commissioner to Canada, Sir William Clark sailed from New York to Great Britain.

The British Columbia government will construct a new bridge across the Fraser river at New Westminster, Premier T. D. Pattullo has announced.

The Madrid political address—the brown shirt storm troops and the black shirt schults—have come to stay. Adolf Hitler asserted at the Reich's annual party congress in Nuremberg, Germany.

A new deal for soap-box orators was declared when Robert Macdonald, commissioner of New York parks, announced that nine city parks, in addition to traditional Union Square, will be available for open-air meetings.

The general business outlook in Great Britain has brightened since June, Sir Joseph Stamp, well-known British economist and a director of the Bank of England, declared before the members of the Aberdeen Chamber of Commerce.

An Irish Free State army aeroplane with three occupants crashed in the garden of Lord Leinster's home at Dublin. Lieutenant Arthur Russell and Private Twomey were burned to death; Sergeant Chavann jumped clear of the wreckage but was seriously injured.

With a view to developing a market in Japan for the British sheep, the government has made a trial shipment of Shropshires for breeding purposes. Premier T. D. Pattullo said. The shipment was made by the Hestan Maru.

Reports to the executive council of the Canadian Manufacturers' Association showed imports into Canada from Empire countries during July increased by more than 30 per cent, compared with July, 1933, and exports increased by about 17 per cent.

The Newfoundland commission government disapproved of plans laid before it by the St. John's municipal council to supply funds for charity and civic improvements by lottery. The commission government disapproved legislative action to prohibit it if necessary.

Leaves For England

British High Commissioner in Canada Transferred To South Africa
Concluding six years as British high commissioner in Canada, Sir William Clark has returned to England. He will leave the Dominion about the beginning of the new year to take a similar post to the Union of South Africa and Bantustan, Bechuanaland, Swaziland which are generally known as "the territories." Sir Francis Flood, new British high commissioner to Canada, will arrive in Ottawa about January 1.

Portuguese Africa, Mexico, Jamaica, Australia, British South Africa, British India, Argentina, Chile, Newfoundland, United States, French Africa, British East Africa, Southern Rhodesia, Malaya, New Zealand, St. Pierre et Miquelon, Austria, Palestine, Brazil, Belgium, Bulgaria, Peru, Italy, France, Denmark, and the British Isles are the countries to which Canada exported farm implements or farm machinery during the month of July, 1934.

New Radio Tube
A new radio tube has been invented which is said to be vastly more powerful and efficient than those now in common use. Because the new tube has no filament, no grid and no gas field, it is virtually indestructible.

Peasants Superstitious

Chinese Angry When Authorities Disbelieve Power Of Gods

The deep-rooted superstitions of the farmers of the Yangtze Valley who believe in the power of their dragon gods to bring much-needed rain have brought about several clashes with the authorities and with private persons, and in several cases these clashes have resulted in the deaths of the farmers.

In Kiangnan, a town in southern Chekiang province, the authorities have censured over the fact that the local Kuomintang official expressed disbelief in the powers of the gods, raised the officers and completely destroyed them.

At Chungteh, the offices of the magistrates were surrounded by a group of farmers who forced the magistrate to conduct prayer services before the dragon god. The farmers threatened to kill the magistrate if he refused to obey their commands and pray for rain. So aggressive did the farmers become that the magistrate ordered his bodyguard to open fire, with the result that one farmer was killed and several wounded.

Near the town of Yuxiao a school principal was killed by a mob of 2,000 infuriated peasants when he tried to convert them that praying to wooden and clay gods would not bring the desired rain. The band of peasants was returning, he was prolonged service at one of the temples when the school principal stopped them, and made a speech about the benefits of praying to the temple images. So infuriated did the peasants become that they attacked the speaker and literally torn him to pieces.

Film Stars' Handwriting
Analysed

By LAWRENCE HIBBERT
(Grapho-Analyst)

(Editor's Note: This article will be found especially interesting, desirable as it does with well-known film stars. What does YOUR handwriting tell you? See the invitation following this article.)

A correspondent sends me samples of the writing of several well-known people, and asks me to analyse the writing for her. There is so much of interest in these analyses that I am making them the subject of a special article.

Perhaps you have wondered why many men have been led into the different pursuits in which they have gained fame and fortune. It is immensely interesting to think of what might have been if different handwriting had been theirs.

Men and women are born into this world with different talents and abilities that they must learn to use to take full advantage of them. Some go through life and never learn to control their talents, while others find the driving force in their lives.

Ramon Novarro, the prominent film star, is particularly fortunate in finding his talent and making it his driving force. He is a man who can interpret a role in a way that few people can ever approach, but he is a great dramatic actor, and he has won recognition—his ability in music.

He has found his talent in his writing, and he has used it to his advantage. As an operator singer, Ramon Novarro has been successful in his career, not often given to a man. His talent is his first choice of expression.

He has still another characteristic, another ability. His writing shows an ability to use his hands in a creative way—perhaps in painting, sculpture, or some other means of expression. For some reason, his work has shown artistic ability in so many lines—drama, music and the sculpture.

Take the handwriting of John Boles. Another star. The dominion of his trait in his character is his self-reliance. This is the quality which men depend only on himself for security (quite the contrary) to his many friends, but, at the same time, he looks to one man only to get it, and that man is himself.

John Boles could not do anything else if he desired—there is a tale-peddler who thought his article that will not allow him to think of help when he has a problem to face. He is close-mouthed about his personal affairs, and will usually have them solved before other people have heard about them. Decisive, quick thinking.

If you want a personal reading of what your own writing reveals, send a letter to your normal handwriting.

SUNDAY SCHOOL

By JACK MINER, Canadian Naturalist

"The little boys that I worked with in Sunday School twenty-five years ago are today the living stars of our church executive. In other words the Sunday School boys of today are the foundation of tomorrow's Church and Christianity. And without some form or way of introducing our children to Jesus and His love, the foundation of Christianity are bound to go down, and if we allow our established Christianity to go down we lose the very soul of the most prosperous and looked-up to continent on the earth to-day. We

could be no underprivileged, handicapped, uneducated, man rise up and have his grey hairs respected by all classes of people more than I have in the last twenty years. It all started when my little seven-year-old boy took me by the hand and led me to the way of the Sunday School over thirty years ago. Remember, the foundation of our public schools and all other good things that follow. The best public school teachers I have known, producing the best results in the public schools, were, in

Gold Strike

Find Of Great Importance In Northern Saskatchewan

Strike: of gold on the shores of Lake Athabasca in north-western Saskatchewan is a find of major importance, according to Hon. T. G. Davis, K.C.

Mr. Davis returned from Edmonton recently, where he met several prospectors just back from Lake Athabasca. Reports were favorable to the gold find, he said.

The strike lies 60 miles east of the Alberta boundary in Saskatchewan, and is easily accessible by water since the quartz lies right on the lake shore. Assays as high as \$150 have been reported.

A Novel Lightning Rod

Many people of Central Europe believe that lightning will not strike a house if certain vegetables are grown on the roof. The German domestic, or thunder cabbage, is most commonly used for such lightning prevention.

Fat which has become slightly rancid, or fat that has been used for deep frying, may be clarified and rendered sweet again by boiling it with a few slices of raw potato.

482
SMART FOR EARLY FALL AND
EQUALLY SUITED FOR THE
MATROUS YOUNGER
WOMAN

"The little boys that I worked with in Sunday School twenty-five years ago are today the living stars of our church executive. In other words the Sunday School boys of today are the foundation of tomorrow's Church and Christianity. And without some form or way of introducing our children to Jesus and His love, the foundation of Christianity are bound to go down, and if we allow our established Christianity to go down we lose the very soul of the most prosperous and looked-up to continent on the earth to-day. We

could be no underprivileged, handicapped, uneducated, man rise up and have his grey hairs respected by all classes of people more than I have in the last twenty years. It all started when my little seven-year-old boy took me by the hand and led me to the way of the Sunday School over thirty years ago. Remember, the foundation of our public schools and all other good things that follow. The best public school teachers I have known, producing the best results in the public schools, were, in

SMART FOR EARLY FALL AND
EQUALLY SUITED FOR THE
MATROUS YOUNGER
WOMAN

It has trim, modish range shoulders, plus tucked which makes a very attractive dress. No sleeves to get into amiable, makes this attractive dress very easily fashioned by even an amateur sewer. And you'll agree, the material is extremely becoming and youthful.

This style looks stunning made up in one of the new heavy crepe silks, or in a lovely rayon with woolen effect or new rayon weaves.

The original as sketched is rust brown crepe silk with tending dull, bengaline silk collar and belt.

Style No. 482 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 3 1/2 yards of 38-inch material with 3/4 yard 38-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Send no money now. We will bill you later.

Little Journeys In Science

ATMOSPHERIC PHENOMENA
(By Gordon H. Goss, M.A.)

Dust, comets associated with the petty particles which fill the air in the course of "dust storms," is in reality responsible for some of the greatest beauties in nature. Blue skies, purple twilight and rain drops are caused by small dust particles which fill the air. Day would be almost as black as night, scientists say, if it were not that the particles of dust break up all the components of white light except the blue which we see in the sky. Sunset, with its richly-colored clouds, is the result of dust particles blotting out all the seven colors which combine to make white light, except those we see reflected in the sky. Twilight is the reflection of the slanting sunlight from particles of dust high in the air.

To dust, too, is due the rain and snow fall. Moisture in the clouds forms into drops or flakes by clinging around the small dust particles suspended in the air. Rain clouds usually travel about a mile above the earth.

The "ring around the moon" which is a common phenomenon in cold weather, is caused by ice crystals in the atmosphere. The sun's light from the moon's light and scatter some of the colors, reflecting others, and giving the familiar effect. "Red dogs" across the sky are produced in this same way.

Sun spots activities projected on the atmosphere, are responsible for two other common spectacles in the sky, the aurora borealis and the rain-bow. The aurora borealis is a kind of major interest to popular biology. It is a rainbow forms a full circle in the sky, and not the arc with which we are familiar. Mr. Gould, man, ascend high enough into the air he would pass through the rainbow in its entirety. This has been accomplished by airmen in recent years.

Interesting Discovery

Find Location Where Pagan Rituals Of Indian Snake Dance Held

Deep in the almost inaccessible bush country of the Whiteshell forest reserve, white men now know—where the first time perhaps—the Pagan rituals of the Indian snake dance cult were performed.

Archaeologists were enthusiastic over the discovery of a series of monumental stones believed to mark the spot where the Indian ceremonies were carried out.

Location of the stone is on the Whiteshell river near the Manitoba-Ontario border and about 100 miles due east of Winnipeg. On or about September 1 to 3, Harry Hand, H. W. Carter, Percy Stokes, and Mrs. Percy Stokes, all members of the Manitoba museum, made the discovery.

The party travelled 10 hours by power boat, canoe and on foot after reaching the Whiteshell river before they found the ceremonies site.

Dr. H. M. Speechey, president of the Manitoba museum, declared the find of international importance. At an executive meeting of the museum board it was moved to have the discovery placed either under the protection of the Manitoba government, the Royal Canadian Mounted Police or both.

Weather beaten stones over an area estimated variously at four to six acres mark the site. Dr. Speechey said he believed that in pre-pottery man days, probably 400 or 500 years ago, either the Cree or the Chipewyan Indians belonging to the Snake cult, practised their ceremonies on this spot.

Artificial Drying Best

Sun Drests Large Volume Of Food Properties Of Hay

"Making hay with the sun shines," is poor conservation, leading to inferior food for animals and indirectly to loss of richness in human diet. But the British Association for the Advancement of Science, at J. Page and Dr. S. J. Watson explained, sun-drying, when it is used to dry hay, destroys a "surprisingly large" volume of its food properties.

Artificial drying, they said, is the ideal method of fodder conservation.

Now You Tell One

Old Sol is "mother" to two chicks at the farm, Arkansas. After Biddy had quit her nest in a field with only a few of her eggs hatched, Old Sol was found on the nest about two weeks later two more chicks broke through the shells. The sun-hatched chicks were normal and healthy. Mrs. W. D. Cobb, owner of the strange brood, said.

The oldest birds in the world were about the size of crows.

Stay On The

Rolled Standard

It seems difficult, sometimes, to stay on the Gold Standard, but the "Rolled" standard—all that's something else again. Once a man has "rolled his own" on Ogden's Fine Cut he's on this "Rolled" standard of smoking enjoyment for life.

Ogden's is might easy to roll and it does give a smoother, cooler and more fragrant smoke. . . . To try Ogden's is to like Ogden's—particularly if you use "Chantrelle" or "Vogues" Cigarette Papers. Ogden's Fine Cut and either of these makes of cigarette papers assure you a standard of satisfaction that's well worth staying on.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

P.S.—At any Public House, Restaurant, or Club, you can get "Chantrelle" or "Vogues" Cigarette Papers. Ogden's Fine Cut and either of these makes of cigarette papers assure you a standard of satisfaction that's well worth staying on.

Your Finger Knows Ogden's Cut Plug

Excavations Important

May Prove Valuable In Tracing Migration From Asia To America

Archaeological discoveries expected to prove of great value in tracing the migration of peoples from Asia to the Alaskan Indians in Alaska and thence to continental North America, was reported at Cordova, Alaska, by Dr. H. H. Hrdlicka, curator of the United States national museum. Dr. Hrdlicka and his five student assistants unearthed a wall 800 feet long and 16 feet high in their excavations of Uyak Bay. At the site in the wall were found many implements and remains of ancient Alaskan cultures which Dr. Hrdlicka said substantiated the contention that two pre-historic races had lived there at different ages.

Recipes For This Week

(By Betty Barclay)

BEEF TEXAS STYLE

Cut cold roast beef in thin, uniform slices and reheat in a sauce made as follows:

- 1 onion
- 1 tablespoon butter
- 2 green peppers, sliced
- 1 cup canned tomatoes
- 1 tablespoon Worcestershire sauce
- 3 drops tabasco
- 1 teaspoon sugar
- Salt and pepper

Slice onion and fry in butter until soft and yellow. Add finely chopped peppers and tomatoes. Simmer until thick. Add seasonings and meat. Cook meat until hot. Serve garnished with small triangles of thin buttered toast.

APPLE JELLY

Use tart apples that are hardy ripe or slightly underripe. Wash and cut the fruit in slices about 1/4 inch thick, leaving the peel on. Arrange to cover about 2 cups to each pound of fruit. Cook 15 or 20 minutes, or until soft. Strain through a cheesecloth bag and then through a funnel one. Add 1/2 cup sugar to each cup of apple juice, or 1/4 cup sugar to each cup juice of moderate acidity. Boil to the jellying point and fill glasses.

"I CAN'T AFFORD TO RISK
FAILURES DUE TO INFERIOR
BAKING POWDER. THAT'S WHY
I INSIST ON MAGIC, ITS ECO-
NOMICAL, TWO-LESS-THAN-30
WORTH MAKES A BIG CAKE."

says MISS M. MCFAIRLANE, Dietician of St. Michael's Hospital, Toronto

MAGIC Baking Powder costs so little—and can
always be depended on to give you uniformly
good results. It actually takes less than 16 words
of Magic to make a big three-layer cake. So why
take chances with inferior brands? Always bake
with Magic and be sure!

MAGIC
MADE IN CANADA

"CONTAINS NO ALUMINUM—This
entirely new baking powder
guarantees that Magic Baking
Powder is free from alum or
any harmful ingredient."

THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Grumada Trail,"
"The Canyon Trail," etc.

CHAPTER I.

"When you tell me that you're
going out to Crevecoeur County to
claim your half of the old Hour-
glass ranch, I tell you, Mr. Keene,
that you're just asking for trouble!"
Simon Burwell, first vice-president
of the Drovers Bank in Cadz, leaned
back in his chair, spread his hands
tip-to-tip and stared at his visitor.
He took him in from head to foot
and frankly liked what he saw. Then
he pulled an open letter on his desk.
"Your uncle was a good friend of
mine," he said. "But he was very
careless or unwise to make me his
heir."

"What do you mean?" Gerald
Keene straightened up in his chair
and Simon Burwell grinned at him.
"Don't carry a chip on your shoul-
der, my boy. I'm not criticizing old
Peter. Why, boy, I loved him. Your
uncle lived years in the West. He
and old Joe Carr were partners
for years. It was quite natural that
when Peter died he should leave the
Hour-glass ranch to his partner, Joe
Carr. But when he dragged you in-
to the matter he only complicated
matters. How long since you saw
your uncle?"

"I never laid eyes on him in my
life," said Simon. "He was my
mother's brother and the family was
widely separated. I happened to learn
of the bequest quite accidentally. I
had been . . . in business . . . in the
Northwest and I happened to drop
in at my old home. There I learned
about the will so I got the letter
from Judge Frame to you to identify
myself. The old judge told me that
when you always handled the family
business. That's so, isn't it, sir?"

"It has never kept me busy, I'm
sorry to say," said Burwell. "There
is no business worth speaking of.
You're the half owner of a big ranch
that doesn't pay a dollar of dividends
and won't. Have you seen your
uncle's will?"

Burwell did not wait a reply. He
went to a wall safe and came back
with a slim document that he read
attentively, accenting every word.

Way to Ease Headaches, Pain Almost Instantly

METHOD OFTEN RELIEVES NEURALGIA
AND RHEUMATIC PAINS IN MINUTES!

Remember the pictures below when
you want fast relief from pain.
Demand and get the method doc-
tored—Aspirin—Aspirin—Aspirin.
Millions have found that Aspirin
even in a bad headache, gives relief
or rheumatic pain often in a few
minutes.

In the stomach as in the glass
here, an Aspirin tablet starts to dis-
solve, or dissolves almost, the
instant it touches moisture. It be-
gins "taking hold" of your pain

Why Aspirin Works So Fast

Drop an Aspirin
tablet in a glass
of water. Note that
it begins to dis-
solve. It dissolves
the bottom. It dis-

practically as soon as you swallow it.
Equally important, Aspirin is
safe. For scientific tests show that
it never does harm the heart.
Remember these two points:
1. Aspirin does not harm the heart.
And, see that you get ASPIRIN. It
must be Aspirin. And all druggists
in the form of a cross on every
tablet. It is Aspirin. Aspirin.

Get 12 or 120 tablets or economical
box of 36 tablets at any drug store.

AN ASPIRIN TABLET BY SPOT METHOD
IN 30 SECONDS begins to dissolve
and goes to work.

What happens in time? ASPIRIN
begins to dissolve. It begins to
dissolve in a few minutes after taking.

When in Pain Remember These Pictures

—ASPIRIN DOES NOT HARM THE HEART—

If you're not mighty careful, you'll
have your head pulled under."

"Fish. Still I don't quite see. If
old man Carr is loan' money, who
pays it out? Where's it comin'
from?"

"I've tried to tell you. God help
you if you try to keep old Joe Carr's
head over water. He'll only drown
you both. But you'd better run out
there yourself, Mr. Keene, and take
a look at things."

"Thanks. I'm going to do exactly
that."

An Gerald Keene rose and took his
hat, Simon Burwell got a glimpse of
gray eyes that narrowed in the glare
and of a mouth that was almost
straight above a full lower lip. The
knowing vice-president grinned a
little.

"I think my visitor will go far,"
he muttered. "I never even asked
him what his occupation is. . . .
Fish. A man used to selling bonds'll
not learn much about a ranch, but
I don't know. Old Judge Frame evidently
takes an interest in him. . . . And
I'm well out of the business." But
he rose and walked to the long win-
dow and watched his late caller as
he left.

A half-hour later Gerald Keene
plunged through the door of a hotel
room, slammed the door and gripped
the shoulder of a man who was sit-
ting in a chair by the window, watch-
ing the world spin past between the
toes of his boots on the tile.

"Durn," he said, "we're in a mess
right up to the hocks. I swear I
don't see any answer to it. . . . His
face fell and his eyes twinkled.
There are eyes that gleam and eyes
that twinkle. These twinkled. There
is a difference. One has humor; the
other has none. Some studied the
other for a moment.

"About," he said.
"I've gawed old man Burwell my
letter full of introduction and he told me
all he knew about the Hour-glass
ranch. It seems that by my uncle's
will he left the ranch in mine; the other
half belongs to his old partner, Joe
Carr. He lives on the Hour-glass
with his daughter and has made a
fair failure of it. If either of us dies,
the other gets the entire ranch."

"What could he tell you about your
uncle?" demanded Simon.
"Very little; only that he was a
lovable old fellow and that he was
mighty fond of Carr. Oh! He told
me, too, that two men, Dustin and
Goddard, in the past few years have
bought up a lot of 'acres' and started
a ranch. He guessed that Dustin and
Goddard have been systematically
lookin' the Hour-glass for years. Too
bad about old man Carr's reform."

"It sure is. You can drink any
body, but a systematic drinker. Go
on."

"That's all. Burwell said there's
a regular feud between the two ranches
that reached the status of a Civil
War on pay-day. I reckon old man
Carr's been shootin' off his mouth too
much about a drinkin' spell. You
know it. It is. I've seen it. But
more they ever started to say.
Could you find out anything?"

A little. While you were over at
the bank I hunted up a man I knew.
You see, I used to work for the
Lamy & Co. in Nebraska. They were a
big outfit. I was in charge of the
cattle and they had a stock-ranch
association and that's a lucky bet in
a cattle country. Just because Ne-
braska was crazy over Free Silver's
no reason her people shouldn't be
same in spots. Old Ben Lyon, who
was for the attorney, is practi-
cally here now. I saw his shingle.
I went to see him while you were
with Burwell. . . ."

"Well . . . go. Maurice Brodie, young
Canadian research leader formerly of Ot-
tawa, Ont., now connected with the
New York City health department,
has carried recent experiments with
the polio-vaccine which appar-
ently has proved successful on a
number of human volunteers, including
Dr. William H. Park, head of the
New York City health department
research laboratories. Dr. Josephine
Mead, Dr. Brodie himself and number
of children.

German Bookkeeper Finds Them
Better Than Currier Figures
A German bookkeeper has found
new use for beer. They are no
longer to be mere honey-gatherers
and wax-burners, but messengers
of good news. The bookkeeper has
written messages on the labels of
beer and fastened them to the
backs of the beer. The beer has quickly
brought them back to the hive, and
never has a bee failed to deliver the
goods. The bookkeeper, Herr Bernhard
Gubler, says bees are less likely than
children to fall into the wrong hands.

BAKE'S SOAP

Keeps You Clean and Soft

Carried Out Old Idea

Peter The Great First Thought Of
Huge Russian Czar
Praise to whom praise is due—and
most assuredly praise is due to the
Russian engineer, Serge Xyk, en-
trusted by the Soviet government
with the gigantic task of linking the
Baltic and the White sea by means of
canal, and to be the biggest in the
world. It was in December, 1931,
that operations started under the
most discouraging conditions. To
begin with, sufficient stock had not
been trained, recruited for the most
part from young graduates with little
else but enthusiasm for their equip-
ment. Then there were the natural
obstacles—floods, intense cold, diffi-
culties of supplying the necessary
building materials food for the work-
ers, etc. On top of this there were
no skilled craftsmen to be found in
the local area and a totally insuffi-
cient number of unskilled workmen. Not
the least remarkable of Xyk's
achievements is the method by which
convicts, to the number of about ten
thousand, were converted into will-
ing workers by promise of freedom
if they faithfully performed their
duties for the benefit of the country.
Many inspiring tales are told of the
heroism of these men, who labored
with self-respecting patriots, who labored
with a will to get the job completed
on time—it was finished in nineteen
months.

It is said that Peter the Great had
such a canal in mind when he trans-
ferred his capital from Moscow to
St. Petersburg. His great was to
utilize the two great lakes, Onega
and Ladoga, for the purpose and this
has now been done. On the Onega-
White sea section sixteen dams had
to be built, with 33 canal locks, 22
locks, 19 locks, 19 locks, 19 locks,
13 had to be constructed in hard
ground over a hundred feet below sea
level, while millions of cubic yards of
rock had to be blasted and removed,
and a million and a half fees were
cut down and carried away.

Pure By Airplane
Fur trading in Canada to-day con-
tinues strictly with that in the old
days. Recently a shipment of furs
valued at \$125,000, consisting of
forty-four bales weighing 1,840
pounds, was carried by airplane from
Northern Alberta into Edmonton, the
capital of the province. This was
the largest and most valuable fur
cargo brought from the North by
plane. In previous years many weeks
of slow travel were required to make
such a delivery.

Eastern and northeastern Indian
tribes have a tradition of a descent
from the sky as the beginning of
human inhabitants on the earth; In-
dian peoples of the mountainous and
plateau regions of the south and
southeast believe their ancestors
descended from the underworld.

IN CLIFF HALL
TONIGHT**

Mr. Donald Cameron, B. A.

will be the Speaker. His Subject will be

"Folk High Schools in Scandinavia"

Interesting

Local Items

Keep in mind the illustrated lecture in Cliff Hall tonight. This will be well worth hearing and seeing.

Mrs. McKinney and her son, Raymond, of Arrowwood, spent a few days in town this week, visiting Mr. and Mrs. B. E. Johnson.

Mr. F. R. Mason and son, Leslie, of Fort William, arrived in town Saturday. They are visiting Mr. Mason's sister, Mrs. W. King, and Mrs. King for a few days.

Mr. Alex McManan, of Clay Bank, Sask., formerly of Redcliff, spent last Monday in town on his way home from Edmonton, where he had been with his son Hugh, who is attending University there.

Despite the unfavorable weather the beginning of last week, the three day celebration in Medicine Hat last week-end turned out very successfully. There was a big crowd in the city and the program was carried out as per arrangements.

A quiet wedding took place at the bride's home in Medicine Hat, last Saturday afternoon when Wilfred Bell, son of Mr. and Mrs. W. Bell, of Redcliff, was married to Miss Ellen Nichol, of Medicine Hat. The young couple will reside in Redcliff.

Mr. and Mrs. A. N. Collard entertained last Friday evening in honor of their house guest Mrs. J. Melville of Portland, Ore. Progressive bridge and whist were played. In bridge honors went to Mrs. R. T. Hargrave and E. L. S. one while Melville and R. C. Hargrave drew the consolation. Mrs. C. T. Hall and H. G. Sheehy took the honors in whist and consolation went to Mrs. Dubeau and G. Burkold. After refreshments a most enjoyable evening was brought to a close by singing "Auld Lang Syne" and "Will ye no Come Back Again."

Capt. A. G. Osgood spent last weekend in Pincher Creek attending a military school of tactical exercises.

The cottage being built at the rear of the S. E. Gust store is now nearing completion. It is a tidy cottage and will make a fine residence.

Mr. R. J. Fallis, inspector of deer parsons and clubs, was in town Tuesday on his regular inspection trip, and found everything satisfactory.

Mrs. McLachlan leaves Saturday for Toronto where she will visit friends for a short time before leaving for St. Paul to visit her sister at Ayr.

The Ladies' Auxiliary to the Legion will hold a sale of work and home cooking in the L.O.O.F. hall on Tuesday, Nov. 6th at 3 o'clock in the afternoon. Further particulars later.

On Saturday afternoon Sept. 29th Theodore Albert Neisen and Alice Eileen Stafford, both of Brooks, Alberta, were happily married by the Rev. E. K. Pow in Gordon Memorial Church. The bride was attended by Miss Kate Waters, and the groom was supported by Robert Stafford, brother of the bride. Mr. Nelson, Mother of the groom was also present. After the ceremony the party proceeded to Medicine Hat, and from thence to Brooks where the newly weds are to make their home.

What happened to the canary? This is the problem Mrs. G. W. Fishery would like to have solved. Last Saturday the members of the Fishery family spent the day in Medicine Hat. On their return home, found one of their most highly prized male canaries was missing. The bird was in a cage with several others and when it was missing a search was made around the house but no trace of it could be found. As there were no signs of any feathers or any part of the bird found, the conclusion is that some one went into the house while the family was away, and stole the singer. It certainly was a dirty trick.

FOR SALE—Fall Rye for seed. Apply R. Landis, west of town.
